

CTO & BACTERIA PROTECTION

Designed to deliver superior water quality for mixed beverages, including both carbonated and non-carbonated drinks, the SERVE Taste Filter ensures every sip is as good as the last. This advanced filtration system uses multi-stage technology to protect against bacteria, microplastics, and fine particulates, guaranteeing the cleanest water for your beverages.

With the added power of granular activated carbon, the SERVE Taste Filter effectively reduces chlorine, unpleasant tastes, odours, and PFAS. The result is water that's consistently pure, creating the perfect base for every beverage. Experience cleaner, fresher-tasting drinks that truly stand out.

FEATURES & BENEFITS

- Perfect for post-mix syrups, used in carbonated and non-carbonated beverages
- Ultrafiltration membrane to target bacteria
- Granular activated carbon to target CTO
- Available in Medium
- Systems come complete with the cartridge, head, bypass tool, bracket and two 3/8 x 3/8 push fit adaptors

TECHNICAL DATA

Flow Rate (lpm)	2-4
Operating Temperature (°C)	4-38
Max Operating Pressure (bar)	8
Port Size (")	3/8 Thread
Rated Capacity (L)	100,000

MATERIALS OF CONSTRUCTION

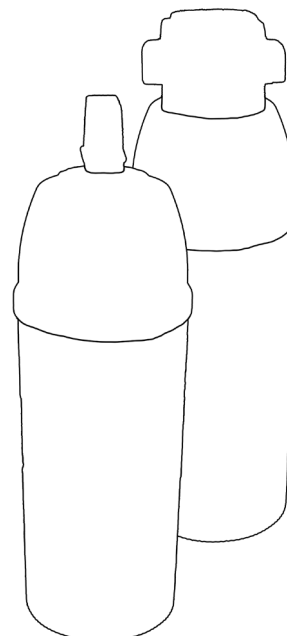

Filter body:	Polypropylene & glass fibre
Filter head:	Polypropylene & POM
Membrane:	Ultrafiltration membrane
Carbon:	Granular activated carbon
